

**STRONGER TOGETHER:
LET'S GET
VACCINATED!**

**Through continued safety monitoring,
COVID-19 vaccination has been found safe for
children and teens -- SCIENCE RULES!**

Before recommending COVID-19 vaccination, scientists conducted clinical trials with THOUSANDS of children and teens to make sure the vaccine is safe and effective!

Getting vaccinated and staying healthy means more time to play with friends....

...and to have fun exploring
new places!

Getting vaccinated helps keep you
and your loved ones
safe and healthy!

WHERE CAN I GET VACCINATED?

West Henrico Health Dept
8600 Dixon Powers Dr,
Richmond, VA 23228

Richmond City Health District
400 E Cary St, Richmond, VA
23219

Walgreens pharmacy

CVS pharmacy

The Pediatric Center
10571 Telegraph Rd #110,
Glen Allen, VA 23059

MYTHS & FACTS ABOUT COVID-19 VACCINES!

Myth: There are severe side effects from COVID-19 vaccines.

Fact: While many people do not have reactions after vaccination, it is normal if you do. It does not mean you have the COVID-19 infection. It is an indicator that your immune system is responding to the vaccine. If you have a reaction, take some time to rest and allow your body to recover.

Myth: Children can't get severely sick with COVID-19, so they don't need a COVID-19 vaccine.

Fact: A COVID-19 vaccine can prevent your child from getting COVID-19 and spreading it at home and in school.

Myth: COVID-19 vaccines will alter my DNA.

Fact: The first COVID-19 vaccines to reach the market were messenger RNA (mRNA) vaccines. According to the CDC, mRNA vaccines work by instructing cells in the body how to make a protein that triggers an immune response. Injecting mRNA into your body will not interact or do anything to the DNA of your cells. Human cells break down and get rid of the mRNA soon after they have finished using the instructions.
